Do you know this feeling...

A little more FREEDOM... something special...magical...

You should give HER a try...

De-Lady

the different kind of stereo delay...

Prime Studio® De-Lady

Offers you measured sound characteristics of a rare vintage analog stereo delay. Heavenly soft harmonics and devilish sizzling heat to roast your tracks by blending in harmonic distortion.

This one is all you need to give your mix some magic and more..

De-Lady gives you a versatile analog delay effect and the sound of Charly 666 Limited in just one unit, with the possibility to switch each stage on/off separately to conserve your precious system resources.

It's system friendly..

It's probably the most flexible delay you've ever used.

Prime Studio® De-Lady

Specialized in offering rare and unique analog vintage equipment to our customers for their productions at Prime Studio® it was obvious going a step further presenting sparkling sound in the digital domain too.

Collaborating with one of the audio industry's leading audio plug-in developers, Acustica Audio, Prime Studio® now offers special versions of highly sought after analog vintage audio devices having already shaped the sound of countless international hit recordings across the music genres.

Inspired by a heavily modified tube summing amp, a daily used analog delay & a vintage tube saturator, this tool brings more than vintage sparkle to your productions whether you are in the studio or producing your tunes anywhere around the world.

With De-Lady you will rethink your FX-chain...

System Requirements

Minimum system requirements:

PC: Multicore CPU, 64bit operating system (min. Windows 7), 8 GB RAM, 500MB HDD, 1024x768 screen resolution, VST2 64bit compatible audio host. AAX 64Bit operating system and DAW (PT 11 or higher).

MAC: Dual Core CPU, 64 bit operating system (min. OS X 10.9 - Mavericks), 8 GB RAM, 500MB HDD, 1024x768 screen resolution, VST/AU 64bit compatible audio host. AAX 64Bit operating system and DAW (PT 11 or higher).

Recommended system requirements:

PC: Latest multicore CPU (Intel Xeon v3 or Intel i7 generation 4 or 6 or newer is recommended.), latest 64bit operating system, 16 GB - 128 GB RAM, 500MB HDD, 1920x1080 screen resolution, VST2/AAX 64bit compatible audio host.

MAC: **M processor compatible!** Latest multicore CPU (Intel Xeon v3 or Intel i7 generation 4 or 6 or newer is recommended.), latest 64bit operating system, 16 GB - 128 GB RAM, 500MB HDD, 1920x1080 screen resolution, VST2/AU/AAX 64bit compatible audio host

Important...

- Please be sure to run the latest „Aquarius“ for installation & authorization of your plug-ins with administration rights on your system.
- Prime Studio® plug-ins work with AU (Audio Units), VST (designed by Steinberg) and AAX (AVID Pro Tools) audio plug-in standards.
- Plug-ins have been tested on MAC with: Ventura, OS Yosemite, OS El Capitan, OS Sierra, Avid Pro Tools 2023-6.0, Apple Logic ProX (AU), Steinberg (Wavelab, Nuendo), Ableton
- Plug-Ins have been tested on PC/Win with: Windows 10, Avid Pro Tools 11/12, Steinberg (Wavelab, Nuendo)
- The number of simultaneously usable instances depends on the performance of the particular computer system.
- Plug-in can be used on individual tracks, busses, or the master bus, depending on which type of plug-in is needed for your specific workflow.
- Using multiple plug-in instances in a session increases the need of CPU power. Therefore higher latencies may occur.
- Some plug-ins contain different versions. The standard version serves the highest audio quality and needs more CPU resources. The „ZL“ (ZERO-LATENCY) version is meant for use in recording situations where lowest latencies are needed.
- The „LIVE“ version is available for some dynamic tools like compressors or limiters only. Compared to the standard and „ZL“ versions it differs in sound as the preamp stages used to shape your tracks with harmonic distortion are deactivated. This leads to lower latencies and less CPU loads.

De-Lady

Features & Tips

Charly Ltd. feature

The delay sounds a little... "boring" itself?
No need for another plug-in - use
harmonic saturation direct inside the
delay .

Meters

Yup... some more of those
ear-replacement tools...

Good old Charly

The "one knob" you know by
using our free Charly.
Gives your tunes / stems the
wideness and glue
of a real world mix.

Feedback adjust

Just the feedback...
but what happens if
you drive it...

As always, just a matter of taste!
Trust your ears to adjust...

Mix Feature

Dial in to your taste or use
the 100% as AUX insert.

De-Lady

Features & Tips

Subdivision left / right

Here you are able to choose a subdivision for the left & right delay of each side separately.

Stereo PreDelay

Dial in the PreDelay for setting up room sizes or more groovy delay sounds.

Section on/off

Turn each section on/off separately. Just use whats in need & save system resources.

Main Tempo

All right, thats a hard one to guess, but as you do RTFM*, here is the explanation...

1/1, 1/2, 1/4, 1/8, 1/16, 64th, of the tempo you set in your DAW or even more free if you haven't synced the tempo.

Delay Gain/db

Output gain. nothing else...

* RTFM - READ THE F***** MANUAL.

FAQ...

What do I have to do after purchasing a plug-in?

Please download the installation tool „Aquarius“ from the download section of our website. You can find „Aquarius“ in “Account → Download” (top right of our website). After installation please log in to „Aquarius“ using your Prime Studio customer account credentials. In the „Purchased“ section click on the plug-in you want to install / activate and you are all set. „Aquarius“ will take care of everything else for you.

With Aquarius you can install, activate, deactivate & uninstall the Plug-ins.

How do I choose between the Mac & PC trial version?

You will find PC and Mac trial versions of the plug-ins at www.primeplugins.com

Can I authorize my purchased plug-in with the activation tool on your website?

No, this tool is only for old versions (→ 2018) of our plugins.

How long does a trial version last and are there any limitations?

The trial versions are good for 30 days without any limitations.

You can install and use trial versions only once on a system.

Can I authorize / upgrade the trial versions to work as full versions?

No, the trial versions only work during the trial period and can not be updated to a full version license.

FAQ...

Do I need an i-Lok for the trial activation?

"Aquarius" will take care of the installation & authorization of your Prime Studio® plug-ins. Full & trial version.

You will find "Aquarius" in your personal Prime Studio® account.

Can I install plug-ins on an external hard drive to work on different computers?

No, your personal key is hardware and OS related. Don't try to copy & paste your personal key from an old computer to a new one, this will result in failures or crash of your audio host.

You will get the PC and the Mac version of the plug-in you have purchased.

FAQ...

Where do I find the plug-in folders on my system?

Mac/OSX paths (fixed paths)

- AAX plug-in folder 32 and 64 bit: OSX HD/Library/Application Support/Avid/Audio/Plug-ins
- VST plug-in folder 32 bits: OSX HD/Library/Audio/Plugins/VST/Acustica
- VST plug-in folder 64 bits: OSX HD/Library/Audio/Plugins/VST/Acustica64
- AU plug-in folder 32 and 64 bits: OSX HD/Library/Audio/Plugins/Components

PC/Windows paths

(Non fix paths! This depends on the DAW you use. In the following you see some possible paths)

- AAX plug-in folder 32 and 64 bit: Program Files/Common Files/Avid/Audio/Plug-Ins
- VST plug-in folder 32 bits: C:\VSTPlugins\Acustica
- VST plug-in folder 64 bits: C:\VSTPlugins\Acustica64
